To become a doctor in my country, someone needs to get himself admitted into a medical college after passing the 12th. And then there is an MBBS course lasting for six years. That's the process. And then some go for higher education and some start working in different places.

But it's very tough and challenging to take admission in medical colleges. There is a huge competition. Thousands of students participate in the admission test. But the seats are only a few. But I'm confident enough that I will make it.
