In Bangladesh, people are mad about cricket. I am also a cricket lover. [Cricket](#) is my favorite game. I used to play cricket in my school and in my local field. There is a really strong school cricket team at our school. I have gotten a chance after some really good performance.

All rules and regulations are really hard in cricket. It's a game about learning and attention. While someone is batting, he needs to focus on the bowler 100%, if he loses his focus, he will lose his wicket and have to go out. There are two innings, one team does batting and score runs.

That run becomes a target for the other team. They start batting and if they can score more run than the other team has scored, they will win the match. If they can't score they will lose. Cricket is a really beautiful game. It taught us so many real lessons that we need to have in our life.
