Save Water Paragraph

Short Paragraph on Save Water (100 Words) for Class 1, 2, 3, 4

Right after air, the most important thing in this environment is water for us. We can't survive without water. But there all water isn't safe for us. There are lacking clean water in the world, and we are wasting a lot. From now we need to be aware to avoid any water shortage in the near future. If everyone likes you and I become aware of this then we can do that easily. We should learn the technique that teaches us how to [save water](#) and let people know about these tricks and try ourselves.

Save Water Paragraph (150 Words) for Class 5, 6, 7

Water is our basic need and most of us have been raised in a place where water is free or cheap. It is easy to have and wastewater for us. But there are lots of areas where they don't have enough water to drink for. That's called the water crisis. We can face the same crisis if we don't become aware of water-saving. We all need to know and learn about this.

We need water to drink, to bathe, to cook food, to wash our things and lots of basic things. If we keep wasting water and face a crisis of water then the condition will be worse. That's why we need to be careful when we have time. There are lots of ways and tricks to follow to [save water](#). I suggest everyone use water-saving shower-head in their bathroom and taking a shorter shower. And don't keep turn on your tap while you are shaving.

Save Water Paragraph (200 Words) for Class 8, 9, 10

The entire world has a shortage of safe drinking water. Maybe you have got enough water where you are living because it is a privileged area or city. But there are lots of countries facing huge water problems. So we need to [save water](#) to fulfill the demand. If we don't save water, we might face a water crisis in the future. Might be our next generation will face this. So we need to be aware of now. This is not deadly hard to save water. With a couple of steps and effort, anyone can save lots of water regularly. To save water, you need to follow some tips. Check your all toilet and other pipes leakages. If there is any small leakage that you are missing, that might waste a big amount of water regularly. Instead of using a shower, you can take water in a bucket while bathing. This is good for health too. Or you can install a water-saving shower-head. Some people keep turn on their water supply when they are shaving. You shouldn't do that. You must need to turn off your tap. Teach your kids about the importance of water-saving, because I believe lots of the kids play with water.
