

Short Paragraph on How to Cook Rice for All Students

Description

It is not hard to cook rice. If you want to cook rice, you need some basic things. First of all, you need a stove, some rice, a pot, water, a cup, a wooden spoon, and salt. First of all, you have to boil water and have to add salt. But some people don't add salt, it's your personal preference.

You can use a cup to measure rice and water. For every cup of rice, you have to give 1¾ cup of water. When the water is boiled, you have to add rice there. You have to be careful about the amount of water. Now you can use your wooden spoon to separate all the clumps in the pot. Don't overdo it, otherwise, the rice will be sticky.

Then cover the pot with a lid and wait. It depends on your amount of rice that how much time it will take to become ready. When the rice is ready turn the stove off and removes all the extra water from the pot. And finally, fluff the rice with a fork to separate every grain. Don't overdo that too. That's how you will be able to cook your rice.
